

AMERICAN BOTTOM WATERSHED PLAN

Madison County Community Flooding Survey

for Homeowners, Businesses, and
Property Owners

We Need Your Help!

Thank you in advance for taking the time to fill out this survey regarding the impact of floods on homes, businesses, and property in Madison County. Your response is greatly appreciated. This survey is part of a larger planning effort for the the American Bottom watershed on the southwest side of the county. Your response will help determine strategies and recommendations for addressing flooding problems in the watershed.

What is a Watershed Plan?

A watershed plan identifies strategies to improve water quality and reduce the impacts of flooding. The watershed plan for the American Bottom watershed will:

- Document existing conditions.
- Develop recommended strategies to improve water quality and address flooding, and act as a roadmap for communities, agencies, and landowners to implement future improvements.
- Help reduce costs for homeowners, businesses, and taxpayers.

This watershed planning effort is an important component of Madison County's Stormwater Management Plan, and part of a larger effort to create plans for all of Madison County's major watersheds. Multiple partners are involved in this effort, including Madison County, HeartLands Conservancy, the U.S. Army Corps of Engineers, and the Madison County Soil and Water Conservation District.

Please complete and return this survey by
July 31, 2017.

Your time and input is greatly appreciated!
